

Minutes of the meeting for parents of newly admitted children for the 2025/26 school year

Date: 23. 6.2025

Attendees: representatives of the kindergarten management and parents of newly admitted children

- Welcoming parents, introducing the kindergarten management, handing over the document "Decision on admission" for signing and the application for school canteen
- Introducing parents to the "Ten Commandments for parents before their child enters kindergarten" - this information can be found on our kindergarten website in the section "List of things to bring to kindergarten" („Seznam věcí do MŠ“).
- Introducing the school rules and the change in time for children to arrive at kindergarten: children must arrive at kindergarten by 8:10 in the morning, the kindergarten closes at 8:15. After picking up the child from kindergarten, whether after lunch or in the afternoon, parents with children do not remain in the kindergarten garden. The school rules can be found on the kindergarten website.
- Information about meals. The school cafeteria/kitchen is a separate entity. It also has its own website and bank account. The variable symbol is the same for meals and for paying school tuition. The variable symbol will be assigned to children at the beginning of the school year.
- Information about the number of children admitted and their division into classes (the division of children into classes will be posted at the end of August, the preferences stated in the registration will be taken into account, but unfortunately it is not possible to accommodate preferences completely due to the available places in classes and the need to sustain the right balance of individual class groups). Due to the high number of support measures for children with special educational needs, which according to the law reduce the number of children in classes, significantly fewer children were admitted than the number which left for elementary school.
- Adaptation: parents were informed about the process of adapting new children to kindergarten. The adaptation process is described on the website of our kindergarten.

- Payment of tuition fees - tuition fees have been increased to CZK 1,150 for the 2025/26 school year. Payment is always due by 15th of the given month. Preschool children do not pay. When paying, write the child's variable symbol and also the child's name, and possibly the class.
- Introducing parents to the Twigsee application, not only for communication between the kindergarten and parents and sending photos, but also serves as a digitized registry and records of children, so it is necessary to have up-to-date information in it.
- Introducing the course of the day in the kindergarten.
- The topic of children's illness and sickness rate in the kindergarten - children go to kindergarten healthy, without a cold, without a cough, without diarrhea, etc. Allow the child to recover at home for a few days after an illness. Information brochures about rules on illnesses are available in individual classes.
- The offer of clubs for children for the school year 2025/26 - will be specified in September at the individual class meetings. Clubs start in October 2025. They take place from 4 p.m., in Velvária building from 3 p.m. They are not very suitable for the youngest children. We recommend not to overload children with many after school activities. In the second half of the year there will be a swimming course in the pool in Kralupy.
- Time for parents' questions, farewells
